

italian lovely handmade

LAQUERCIA21 is an Italian carpentry founded in 2010 as the dream of two young carpenters. Our carpentry is located in a small Italian village, called La Quercia di Narni, in the Umbria's countryside, a small green region in the center of Italy, between Florence and Rome..

Laquercia21 is an eclectic idea which always changes by mixing any creative suggestion with functional characteristics. We move from the contemporary design to the traditional craftsmanship, taking inspiration from the world we are surrounded by, as well as art, vintage-pop culture and ecodesign. Our way of production is totally handmade and supported by the traditional carpentry's techniques.

Our furniture is 100% customizable and made using solid wood, new and reclaimed, iron, recycled materials, fabrics, resins, plexiglass and much more. We believe in a different way of thinking furniture, reusing materials and always looking for original alternatives!
